EDUCATION

Atmiya University, Rajkot — BCA

July 2023 - July 2025

Matru Mandir, Rajkot — HSC

June 2021 - June 2023

Matru Mandir, Rajkot — SSC

June 2023

PROJECTS

Weather App —

an app that fetches weather data from an API (like OpenWeatherMap) and displays it to the user. Users can enter a city or use GPS to get their current location's weather forecast.

Calculator —

a basic calculator application that performs arithmetic operations like addition, subtraction, multiplication, and division. You can make it more interactive by adding features like history, memory functions, and advanced operations.

Expense Tracker App —

an app that helps users track their expenses. Users can add their expenses with details like category, amount, and date. The app can then generate reports and insights on spending patterns.

Todo App —

a simple to-do list application where users can add tasks, mark them as complete, and delete them. You can implement basic CRUD operations (Create, Read, Update, Delete) using Flutter's state management and storage options.

SKILLS

Programming Languages:

Dart(intermediate)

Java(basic),
JavaScript(intermediate),
SQL(intermediate)

Frameworks & Tools:

Flutter, Node.js, Express.js,
GetX (Routing),

Databases:

MongoDB, SQL Development

Skills:

Mobile app development,
REST API integration, JSON
parsing

Other Skills:

Problem-solving, version
control with Git, basic
blockchain concepts

LANGUAGES

Gujarati, Hindi, English
